

Front End Web Developer

Internship

The Front End Web Developer Intern will work closely with the Operations Director and IT Support Team to develop and maintain visually appealing, accessible, and user-friendly web pages that enhance the organization's online presence. This role is ideal for a detail-oriented, tech-savvy individual who enjoys combining creative design with technical problem-solving and is eager to gain hands-on experience in a collaborative nonprofit environment.

Responsibilities

- Design, develop, and maintain responsive, user-friendly web pages for the WAA website.
- Update website content, layouts, and functionality using WordPress or a similar CMS.
- Collaborate with the Operations Director and IT Support Team on website improvements and new features.
- Optimize web pages for accessibility, performance, and search engine optimization (SEO).
- Test and troubleshoot website functionality across browsers and devices.
- Implement front-end enhancements using HTML, CSS, JavaScript, and jQuery.
- Identify and resolve bugs while ensuring a seamless user experience.
- Assist with ongoing website maintenance and support special web projects as needed.

Qualifications

- Strong understanding of UI/UX principles, responsive design, cross-browser compatibility, and web standards.
- Proficiency in HTML, CSS, JavaScript, and jQuery.
- Experience with WordPress or similar content management systems (CMS).
- Familiarity with browser testing and debugging tools.
- Understanding of SEO best practices.
- Knowledge of PHP is a plus.
- Ability to work independently, manage time effectively, and complete projects with minimal supervision.

Time Commitment: 10 hours weekly
